

## **Rinklighter by ENMAX Energy**

Rinklighter by ENMAX Energy is an annual community investment program that provides energy rebates for communities who operate an outdoor ice rink. ENMAX Energy's Rinklighter program can light up one rink in your community, from 5:00 p.m. to 9:00 p.m. for the months of November 2009 to February 2010, to help provide a safer winter play area for the kids.

ENMAX Energy is dedicated to the promotion and support of safety and safety-related initiatives. For more than ten years, ENMAX Energy has maintained the Rinklighter program to help communities who value safety fund their community's ice rink operations.

"Rinklighter is a great way to ensure kids have a great time on the ice and a safer place to skate", says **Steve Kuehner, Community Volunteer, CKE Community Association, Calgary.**

ENMAX Energy is dedicated to empowering our community's youth, as well as helping the environment. Since generating the electricity used at community rinks results in carbon emissions, ENMAX Energy is helping communities offset part of their carbon footprint by acquiring on their behalf Renewable Energy Certificates (RECs) generated from renewable energy sources (like wind). ENMAX Energy will apply these RECs in an amount equivalent to the communities' rebated electricity consumption.

Rinklighter is one of the many ways ENMAX Energy is working to build opportunities for family and community participation that energizes and enriches local community life and we thank your community for being part of this great program.
